Databases / Knowledge and Data Management / Data Security / Web / Mining

Although we will attempt to keep this information accurate, we cannot guarantee the accuracy of the information provided. The numbers in brackets correspond to the EIC value (Estimated Impact of Conference). The numbers are normalized to be in the range 0.00-1.00 (the closer the number to 1.00, the better the conference). Only conferences with EIC above 0.50 have been included. We will attempt to update the ranking lists every three months (end of January, April, July, and October), but this is getting more of a challenge than originally anticipated.
